²Affiliation B

Abstract— This is an example of how to prepare the two-page submissions for the XII Jornadas AITADIS de Tecnologías de Apoyo a la Discapacidad (AITADIS 2026), which will be held at University of Alicante (Spain) June 18-19, 2026. The abstract should be no more than 150 words. The abstract should give a clear indication of the objectives, scope, and results of the paper.

1 Introduction

This document is a template for LaTeX. For your convenience we have prepared also a Microsoft Word version of it. You can download both templates from the website: <https://www.huro.ua.es/aitadis2026/index.php/contribuciones>. Both versions are valid for submission.

All contributions will be peer reviewed. Accepted contributions will appear in Conference Proceedings. The contribution should contain 2 pages with the following sections: Introduction, Material and Methods, Results, Discussion, Conclusions, and References.

2 Formatting instructions

2.1 Contents

The style should adjust to fonts and line spacing. **Do not change the font sizes or line spacing to squeeze more text into a limited number of pages.** Use italics for emphasis; do not underline.

Figures can be grayscale or color with at least 300 dpi resolution. Tables should only include horizontal lines. Follow the style of Table I. Tables are numbered with Roman numerals. Large figures and tables may span both columns. Please do not include captions as part of the figures.

To cite figures or tables use capital letters (as shown in Figure 1 and/or Table I). Number equations consecutively with equation numbers in parentheses flush with the left margin, as in (1). Use the equation editor to create the equation. You can make your equations more compact with appropriate exponents or functions. Use parenthe-

ses to avoid ambiguities in denominators. Be sure that the symbols in your equation have been defined before the equation appears or immediately following.

$$\int_{n=1}^m \sin(x^2 + y^2) \quad (1)$$

Figure 1. Example of figure formatting.

Table I. Example of table formatting.

Field 1	Field 2
Content 1	Content 1
Content 2	Content 2
Content 3	Content 3

2.2 References

For reference citation and formatting use Harvard style. In-text citations should include last name of the author(s) and year of publication as follows (Smith, 2015), (Smith and Parker, 2015) or (Smith et al., 2015).

An example of reference list formatting examples is presented at the end of this document. Please include DOI in

all references if available. For further information please check online Harvard style guides.

3 Editorial Policy

Submission of a manuscript is not required for participation in a conference. Do not submit a reworked version of a paper you have submitted or published elsewhere. The submitting author is responsible for obtaining agreement of all coauthors and any consent required from sponsors before submitting a paper. It is the obligation of the authors to cite relevant prior work. The decision to accept or reject a paper is made by the conference editors and publications committee; Undecipherable English is a valid reason for rejection.

4 Conclusion

A brief conclusion section is welcomed although not mandatory. It may review the main points of the paper and future applications and extensions. Please do not replicate the abstract as the conclusion.

Acknowledgements

Sponsor and financial acknowledgement should be included in this section as well as other acknowledgements, e.g., to collaborators or to participants in experimental studies.
